Dear Professor Carr:

Thank you for your letter of 25 March. We are cognizant of the importance of avoiding duplication so that maximum productive facilities may be used in making Soviet scientific research available to US scientists. Our translations are furnished to National Science Foundation, and through their arrangements with the Special Libraries Association they are listed and made available in the Translation Center at the John Crerar Library in Chicago. We would be interested in knowing whether yours are similarly listed with Crerar.

According to our records the [redacted] has just completed translations of articles on machine translation appearing in the 1956 and 1957 issues of Yazykovedeniye which might be of interest to you. We shall endeavor to see that a copy is made available to you.

Very truly yours,

[redacted]
Executive Officer

Mr.
Executive Officer
Central Intelligence Agency
Washington, D. C.

Dear Sir:

As you can see from the enclosed memorandum (the gist of which is also published in the Communications of the A. C. M., February 1958, No. 2, p. 11) I am serving as a headquarters for an informal exchange of Russian translations in the areas of numerical analysis, digital computers, automatic programming, and machine language translation.

In this capacity, I would be very pleased to reproduce and send on to this group of computer research personnel copies of any translations in this area that are sent to me, either signed or anonymous.

Very truly yours,

John W. Carr III
